Intelligent Sonic Paper Protection (iSOP)

fi-7160 Professional Duplex Scanner

Organizations of all kinds rely on Fujitsu scanners for their paperwork processing. Small enough to fit on any desk, yet powerful enough to sail through up to 4,000 scans a day, the fi-7160

Professional Duplex Scanner is unmatched in its speed, accuracy, and reliability.

Scanning speed of up to 60ppm

Optical resolution of up to 600 dpi

Large capacity 80 page automatic document feeder

4,000 page daily duty cycle

TWAIN and ISIS drivers included, making the scanner compatible with virtually any software

Efficient and clean scans

Scan mixed file batches of varying sizes and thickness (receipts, credit cards, etc) in one run. The fi-7160 accurately captures your data and crops each image to the correct size, while also cleaning up documents automatically to ensure clear scans.

Reliable paper feed

Ultrasonic Double Feed Detection identifies sheets stuck together so you don't miss any pages. Our Intelligent MultiFeed capabilities also allows easy manual bypass for sticky notes, taped receipts, and labels.

Careful document handling

Acoustic sensors protect your documents by "listening" to your paper feed. If it hears a misfeed, the sensors will stop your machine immediately to prevent your documents from becoming damaged.

PaperStream Software

PaperStream IP enhances standard TWAIN and ISIS applications by integrating cutting edge image processing technologies, without the need to change or modify any software.

Cleans up the toughest documents, including decorated backgrounds, for improved OCR, reduced rescans, and curtailed specialized profile creation. Blank page removal, auto-rotation, and auto-cropping and deskew allows you to spend less time preparing your paperwork. The scanning application also fills in hole punches, corrects rough edges, and removes small tears. Bar code and patch code support offers batch separation

What is Transparency? How do I use it?

Transparency shows you details about your product's origins, such as its manufacturing date and location. Every item with a Transparency label includes a unique code that can be used to see details about your product's brand story and product features. To learn more about your item, scan it with the Transparency app.

How do I scan the Transparency code?

Download the Transparency App and scan the barcode. The app will display a green checkmark when a product has been verified as authentic. Review 2021, feedback 2021, promo code, discount code 2021, buy, picture, description, sale, price comparison, cheap, cheapest, value for money.
