IMPROVED design with higher quality, adhesive back, and stronger batteries

Frickin' Cricket ranks high on the scale of easy, zero damage, memorable pranks. It emits cricket chirps every 2 to 15 minutes. There are three different chirps so it is realistic. The best things are its small size, which makes it hard to find, and the relatively long periods between chirps, which makes it difficult to track down where it is coming from.

Tips for success: Flip the black switch to the on position, then press the big white face that says FUN.delivery. You will hear a chirp to indicate the device is on. (If you don't, let us know immediately for some replacement batteries.) The batteries will last for about 2-3 days if left on. You can always replace them if you need more time. Turn the black switch to off to save battery life. Contains one device, 8.3 x 4.2 x 0.9 cm and includes three 1.5V batteries (AG13) Made in China

Can you imagine letting a day go by without at least one good belly laugh? Sadly, it happened to me once, but I vowed to never let it happen again. Even deep in the throes of bad burrito, there is humor in the bottom of the toilet.
