Learn about our NEW functions:

Create interactive forms

It takes only a few clicks to add interactive elements, like selection lists, checkboxes or input fields, to your PDF form. These forms can then easily be filled out by anyone using a standard PDF reader.

Compare PDFs

The side-by-side view allows you to quickly compare two PDF documents with synchronized scrolling. This feature is especially handy during translations or while browsing through document revisions of the same file. A single click will reveal even the smallest of changes!

Create snapshots

The new screenshot tool can capture any portion of your document quickly and easily with custom formats, resolutions and color depths, including alpha channel support. Simply capture the parts that really matter to you!

Handy bates numbering

Process any number of files or entire folders and add numbers, texts, e.g. headers and footers, or date stamps with incredible ease.

And there is more...

Seamless image editing

Usually, you would have to export the image, open it in the external editor, save the changes and then reimport it into the PDF. With Ashampoo PDF Pro, a single click opens the image in your preferred editor and, once you hit save, the software will then ask you whether you wish to apply the changes to the PDF document.

Find and replace colors

Sometimes, you need to replace colors through the entire document, e.g. to adapt its design to

company or project requirements. The new find and replace feature makes it easy: Just select the color to be replaced, followed by the replacement.

Convert documents

Ashampoo PDF Pro features a mature OCR engine that converts scanned characters into computer-editable text. Naturally, the program also features seamless file exchanges with Microsoft Word.

Find and replace

Not only can you replace text at the click of a button but also hyperlinks, fonts and colors. It's the fastest and easiest way to adjust the design of your document and you can even apply this feature across multiple files.

and even more...

Comment, edit and highlight

Ashampoo PDF Pro is the comfortable way to add comments to your PDFs, highlight important passages or add drawings for clarification. Built-in stamps like "Approved!" or "Confidential!" further help you mark up your documents.

Fill out and print forms

Save time and fill out your forms on your PC instead of printing and filling them out the old-fashioned way.

Insert, edit, move and crop objects as needed. You can even use them as watermarks to protect your intellectual property or clone them for easy reuse.

Document protection

Thanks to strong AES-encryption, your PDFs are protected against unauthorized and unwanted actions such as opening, editing, printing or text extraction. You decide what recipients can and can't do with your files!

Format, revise and recompose

Rearrange and delete or crop and rotate individual pages as you see fit. You can even insert pages from other PDF documents or combine multiple documents into a single file with incredible ease.
