

Wantdo Boy's Padded Winter Coat Thicken Warm Puffer Jacket with Detachable Hood Review-2021

[Read Customer Reviews](#)

Waterproof: The winter coat with 3000mm/H₂O waterproof index and Durable Water Repellent (DWR) which could always keep your body dry and comfortable in the slight rain for about 2-3 hours

Warm: The quilted winter jacket with fleece lining and enough cotton padding that make the best heat retention and keep warm in cold days

Windproof: The water repellent windbreaker featuring a removable hood with zipper, full front zipper closure, and elastic cuffs design help to keep the wind out

Versatile: Match with a T-shirt or sweater as outerwear; the insulated jacket with a detachable hood can also be worn as an underlayer in deep winter

Reflector: Reflective stripe on the front storm flap from neckline to bust line will be more visible in low light areas

Occasions: Perfect for indoor and outdoor activities in school days, or spring outing, camping, hiking, traveling

Pongee with Waterproof PU Membrane
For added warmth and water-repellent protection in winter environments, reach for the Wantdo Boy's Puffer Jacket and never look back. Combining high quality synthetic insulation with PU membrane, this jacket gives you the toasty warmth and weather protection. This jacket is made from pongee fabric, which is water repellent, windproof, durable and abrasion resistant. Pongee fabric has higher density, combined with a PU membrane under the fabric to form a windproof and water repellent barrier. DWR (durable water repellent) shell keeps the clothes dry in light rain or misty weather for 3 hours.

Features:

Insulated & Windproof & Water-repellent

Versatile detachable hood

2 handwarmer pockets

Reflective strip side the top fly

Soft flannel inner

PU membrane & coating

PU coating is a polyurethane barrier membrane, which has millions pores per square inch, with each pore hundreds times smaller than a water droplet. These tiny holes are too small for water to pass through quickly, and PU coating allows water beads to roll off to keep the fabric as dry as possible. You'll stay dry in light rain or misty for 3 hours.

High Quality Pongee

Pongee is a medium-weight, balanced, woven fabric with an irregular filling and a fine regular warp. The fabric is fully washable, durable, strong and tightly woven which also makes it aesthetic for finished products. Besides, we are able to weave with a higher pongee thread count giving a strengthened, durable winter jacket.

Windproof Designs

PU membrane is an ultrathin protective layer that is laminated to a high density pongee fabric, making the fabric totally windproof. Removable hood with soft fleece helps to seal out wind and seal in warmth. Ribbed elastic cuffs provides a close, comfortable fit for added weather protection.

Soft Flannel

Soft Flannel is a warm fabric of various degrees of weight and fineness. It is a plain-weave cloth heavily brushed for softness. Flannel has an impressive ability to hold in heat and insulate and yet it can still be breathable enough to wick moisture away. Soft and supple to the touch, wonderfully warm.

280G Hand Plug Cotton

Adapt high-quality hand plug cotton (weights about 280g), each ounce of them has thousands of fluffy hollow fiber that interlock and overlap to create insulating pockets of air, which is what keeps you toasty and warm.

Removable Hood

The insulated coat's adjustable, removable hood provides added warmth and acts as a safeguard against cold wind and frigid temperatures to keep your head and ears cozy and warm.

Warm pockets

Hand warmer pockets provide storage for accessories and extra comfort for frigid fingers. The elastic cuffs and hem provide a close, comfortable fit for added weather protection.

Reflective Strip

A water-resistant puffer coat with light reflection strips on the top fly helps kids stay visible during nights or in low light areas and performs the warning function on rainy days.
